

# ‘TRANGO PAKISTAN’

**A Name that is derived from;**

## **Great Trango Tower**

**Great Trango Tower** (6286 m) is part of the Trango massif, which is located across the Baltoro Glacier in the [Karakoram](#) mountain range in [Pakistan](#)'s Northern areas.

The [Trango Towers](#) consist of four summits with sharp ridges. Great Trango Tower was first climbed in 1977 by [Galen Rowell](#), John Roskelly, Kim Schmitz and Dennis Hennek by the easiest route up the western side. The east face of Great Trango is the world's tallest vertical rock face, and was first climbed in [1984](#) by the [Norwegians Hans Christian Doseth](#) and [Finn D穗i](#), who were killed on the descent.

The Trango massif is surrounded by high mountains such as [K2](#), the [Gasherbrums](#), and [Broad Peak](#), all rising more than 8000 meters above sea level.
